International applicants can find the equivalent rating for their country by selecting from the list below. Please note that the equivalence will correspond to the UK classification classification stated on this page (e.g. upper second-class). Where a specific overall percentage is required in the UK qualification, the international equivalence will be higher than that stated below. Please contact Graduate Admissions should you require further advice. Whilst studying Smart Buildings and Digital Engineering, you will learn about integrated building design, advanced modelling and simulation, machine learning in buildings, and performance evaluation. You will develop the expertise to utilise hard-edged engineering methods, quantitative and qualitative tools to test and evolve your designs, integrating quantitative performance considerations.ˆA This Master's is informed by the latest research advances and the evolving needs of the industry. You will have an engineering or science background and will aspire to drive engineering innovation in the built environment. The programme is also relevant to early and mid-career professionals looking to expand their technical skills andˆA knowledge and keep abreast of the latest developments in their field. UCL's Smart Buildings and Digital Engineering MSc offers exceptional university graduates the opportunity to become experts in this innovative and developing discipline. We aspire to generate technology leaders, capable of delivering high-performance solutions in the engineering design of building systems. This Master's is delivered by UCL Institute for Environmental Design and Engineering in the Bartlett School of Environment, Energy and Resources,ˆA home to specialist institutes in energy, environmental design and engineering, resources and heritage.ˆA The Bartlett Faculty brings together the multidisciplinary specialismsˆA required to research, understand, design, construct and operate buildingsˆA and urban environments of the future.ˆA TheˆA QS World University RankingsˆA (2021)ˆA ranks The Bartlett, our faculty, as #1 for Architecture/Built Environment studies the UK and #2ˆA Ain the World ˆA ˆAThe Bartlett's research received theˆA AUK'sˆA Amost world-leading ratings for Built Environment research in the most recentˆA ˆAResearch ExcellenceˆA ˆAframework. As you student at the UCL Institute for Environmental Design and Engineering you will benefit from: A world leading, multidisciplinary learning environment.ˆA ˆA Studying in London, the centre of open innovation and the biggest cluster of engineering and architectural consultancies. Our Institute's long-standing track-record of excellence in building design and engineering research. Our long-standing strong established relationships with industry, policy makers and academia, who often give lectures and attend networking events.ˆA ˆA Our extensive alumni network, now within many of London and UK's major building engineering firms. An inclusive environment that promotes global citizenship, and an ethos of equality and diversity. You will gain core knowledge and hands-on experience with monitoring and energy management systems and applying industry standards. You will use simulation tools including EnergyPlus, DesignBuilder and will become familiar with modelling languages like Modelica. These skills are highly sought after. Members of the industry provide guidance to ensure teaching content and project briefs are relevant to industry needs. We regularly invite members of industry to give guest lectures to enhance your learning experience. You will gain the confidence to undertake large interdisciplinary projects with many unknowns and uncertainties, learning to coordinate work, integrate across disciplines, and make balanced decisions, thus preparing you for professional life. Employability Successful graduates will be equipped with the skills and knowledge required for engineering and specialist roles in companies that provide engineering, design, planning and consulting services for the built environment. Online - Open-Day Smart Buildings and Digital Engineering MSc MSc2022 Virtual open day for smart buildings and MSC Digital Engineering with the Valentina Marincioni program and the Andrea Henny program administrator. A presentation on the program followed by a live session of Q C.A. With the Pˆaˆblico. Online - Open day applying to the Scholarship Presentation of the Mism of Great Britain and that with respect to the Bartlett misma scholarship. United Kingdom Students Description of Rates Exclusive Rates for Partial Use (2022/23) ˆa ˆf 16,500 ˆa ˆf 8,250 Mattered rights (2022/23) ˆa ˆf 29,400 ˆa ˆf 14,700 program fees on a modular (flexible) base. The matters shown correspond to the previously indicated year. The quotas corresponding to later years can increase or vary differently. When the program is offered in a flexible/modular way, the fees are charged to the appropriate full time of the teacher that is taken in an academic session. More information about the state of rates, rates increases and rates schedule can be seen on the UCL students website: UCL.ac.uk/students/fees. ADDITIONAL EXPENSES The expenses of the land on the land are covered by the department. Visits to the site that are within the transport number for London and that are optional can incur additional transport costs. To obtain information about the additional costs for future students, please go to our estimated cost of essential expenses in accommodation and life expenses. Financing your studies below are relevant scholarships for this department. Open requests: March 1, 2022. Date Little: May 31, 2022 Value: Matter rights more than 15,364 Maintenance/YR (Duration of the Program) Criteria based on the financial need Value: Rates, stipend and other subsidies (1yr) Criteria based on the Financial Eligibility: EU, Foreign Value: Up to £24,150 (to cover the cost of fees and a allowance) (1yr) Criteria based on academic merit It is recommended that students apply to competition as soon as possible. Scholarship Funders/Applicants abroad) must take note of the application deadlines. There is an application processing fee for this £ 90 program for online applications and £ 115 for paper applications. More information can be found in the application fees. When we evaluate your application, we would like to learn: why you want to study smart buildings and digital engineering at a postgraduate level why you want to study smart buildings and digital engineering at UCL that attracts you particularly to the chosen program how your academic and professional experience meets the demands of this challenging program where you would like to be professionally entitled. Along with the essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying for this program coincide with what the program will deliver. Please note that you can submit applications for up to two postgraduate programs in any application cycle. UCL is regulated by the student office. Register interest in your chosen subject to receive notice of postgraduate days, events and more. Visit the search and filter more than 2,000 degrees of postgraduate course and find your perfect course. Bartlett School of Environment, Energy and Resources Resources
